

The Big Lie about The Global Warming

Since a few years, all governments in the world say to us "The planet is endangered! Because of global warming!" But they never proposed any solutions for stop this. Just, they try to scare us, they use this argument in their politic program, but they do nothing!

And today, we have new elements for
understand that ;

**The global warming
doesn't exist.**

“There isn't any scientific's proofs that the human activity is, or will become, a responsible of an any catastrophic global warming”

Andrew BOLT

Indeed, we can see that ;

- The sea level decrease, he lost two centimetres for three years.
- The world get cold
- Ice is spreading (Really!)
- There is fewer and fewer of extreme phenomenon's weather

Moreover, for the beginning of times, the rate of CO² vary, and for 300.000 years, he was never been lowest !

Conclusion ; The global warming doesn't exist, it is just an other argument in their "Scare's politic", like when they talk about terrorism, about the war gangs, about ghetto problems, etc... The global warming is a big lie.
